Allowable Subject Matter

Claims 26-47 (renumbered 1 through 22) are allowed.

The following is an examiner's statement of reasons for allowance:

The closest prior art of record neither shows nor suggests all of the elements of claim 1 (formerly claim 26), in combination, and particularly:

"wherein the first optical system includes, an optical integrator which has a plurality of lenses with optical powers different between the first plane and a second plane including the normal and being orthogonal to the first plane, and a condenser lens with an optical power in the first plane, which guides the illumination luminous flux emitted from the optical integrator to the illumination surface", and

"wherein, in the light intensity distribution, an incident angle width at which the light intensity reaches half of a peak value in the first plane is twice or more an incident angle width at which the light intensity reaches half of a peak value in the second plane".

Independent claims 37 and 45 are allowable for the same reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Koide U.S. Patent 7,021,765 B2 teaches an Illumination Optical System and projection Display Optical System.

Yamauchi et al. U.S. Patent 6,497,488 B1 teaches an Illumination System and Projector.
